Education

B.Sc, Computer Science and Engineering

Feb 2018 - March 2023

Shahjalal University of Science and Technology • Sylhet, Bangladesh • CGPA - 3.71 / 4.00 (Last two years CGPA: 3.83)

Research Experience & Publications

- **NumDecoders at SemEval-2024 Task 7: FlanT5 and GPT enhanced with CoT for Numerical Reasoning** [[paper link](#)]
 - Built a **Chain-of-Thought** enhanced solution for **LLMs** aimed at solving mathematical problems
 - Designed a data augmentation strategy using external corpora with **automatic and manual annotations**
 - **Improved** model **reasoning** capability, achieving strong performance in benchmark evaluations
- **Vio-Lens: A Novel Dataset of Annotated Social Network Posts Leading to Different Forms of Communal Violence and its Evaluation** [[paper link](#)]
 - Proposed a **novel framework** for annotating online violence-inciting comments in Bangla
 - Categorized data using **Guided LDA** with a **human-in-the-loop** approach
 - Identified key terms for each category of violent content
 - Created a **novel dataset** of 6046 annotated social media data and provided a benchmark evaluation of the dataset
- **BLP-2023 Task 1: Violence Inciting Text Detection (VITD)** [[paper link](#)]
 - Presented the comprehensive technical description of the outcome of the VITD shared task
 - Conducted under the Bangla Language Processing (BLP) Workshop, **EMNLP 2023**
 - **27 teams** consisting of **88 participants** participated in this shared task
- **garNER at SemEval-2023: Simplified Knowledge Augmentation for Multilingual Complex Named Entity Recognition** [[paper link](#)]
 - Proposed a **knowledge augmentation approach** using the Wikipedia API
 - Enriched input sentences with extracted **external information**
 - Applied ensemble methods across multiple models to get the final prediction
- **Data, Annotation, and Meaning-Making: The Politics of Categorization in Annotating a Dataset of Faith-based Communal Violence** [[paper link](#)]
 - Analyzed the marginalization of faith-based, religious, and spiritual (**FRS**) perspectives in **data annotation**
 - Highlighted the ethical implications of data annotation, emphasizing the need for greater inclusion of faith-based, religious, and spiritual (**FRS**) aspects in the annotation process

Industry Experience

Software Engineer at Orbitax Bangladesh Limited

March 2023 - Present

- Built a **client support platform** that automated task assignment and enabled real-time complaint tracking, improving team efficiency and significantly **reducing resolution time**
- Designed and implemented a **video conferencing system** (“Orbitax Meet”), now used as the **primary platform** for internal collaboration and client **meetings** at Orbitax
- Developed a **parallel file download** solution for handling multiple files concurrently, improving system scalability and reliability, and **reducing average download time by 70%** for large file transfers
- Contributed to building a scalable **user activity tracking** module capable of processing **millions of data**, enabling **reliable monitoring** and audit trails
- Built **reusable components** that streamlined development and **reduced repetitive coding** for other developers

Competitive Programming & Mentorship Experience

- Learned various core and advanced algorithms and data structures on graphs, trees, strings, number theory, and dynamic programming
- Solved **1800+** problems in various online judges, including CodeForces, CodeChef, Vjudge, LightOJ, UVA, etc.
- Participated in some national contests and several online contests

- Codeforces - achieved a maximum rating of **1573** [Username: [NowshadJunaed](#)]
- CodeChef - achieved a maximum rating of **1731** [Username: [nowshad_junaed](#)]
- **Mentored 20+** freshman students to teach different algorithms, data structures, and programming

Honors & Awards

- **Organizer** of **VITD shared task** (Task 1) endorsed by [BLP Workshop @ EMNLP 2023](#)
- Ranked **4th** in the [Code Generation shared task](#)
- Ranked **5th** in SemEval 2024: Numeral-Aware Headline Generation
- Top **10** in 10 language tracks, SemEval 2023: Multilingual Complex Named Entity Recognition

Projects

Shopaholic [[Github](#)]

- Developed an E-Commerce site using Node.js and React
- Built and integrated custom E-Commerce, Bank, and Supplier APIs.
- Implemented a transaction flow where users make payments, the E-Commerce pays the supplier, and the supplier delivers products to the shipping address

Brevity [[Github](#)]

- Built a blog site for experience and resource sharing using the Flask framework
- Enabled a platform for experts to share experiences and for beginners to seek guidance and resources

Dynamic Programming Simulator (DP simulator) [[Github](#)]

- Developed a DP simulator using JavaFX, as no existing DP simulator was available
- This project can simulate six different types of dynamic programming-based problems, e.g., 0-1 Knapsack, Coin Change, Longest Increasing Subsequence, Longest Common Subsequence, Matrix Chain Multiplication, and Edit Distance

Skills

- **Programming Languages:** C, C++, Java, Python, C#
- **Web Frameworks/Tools:** ASP.NET Core, Angular, Flask, Microservices
- **Databases:** MySQL, MongoDB, Redis
- **Cloud & Messaging:** AWS, RabbitMQ
- **Others:** Machine Learning, Artificial Intelligence, Natural Language Processing, Data Structure, Algorithm, Object-Oriented Programming
